TO HAVE THE BEST — BEGIN WITH THE BEST

Hoffman's
Iris Garden

113 D Street

Davis, California

FOREWORD

Once again we would like to greet our old friends and customers, and those of you whom we hope to add to our fast growing list of satisfied customers.

We take pride in presenting our list of fine Iris. It comprises many of the latest and best of these fine perennials. We offer no collections, but let you choose those varieties you especially want, at prices that are in line with other commercial growers.

We ship only healthy one year plants, free from disease; and extras of known quality. Again we state, if anything proves unsatisfactory, please advise us and we will do our utmost to make things right.

This year we are proud to introduce three fine Iris, so please read carefully the following page for complete description.

For those who have never visited either of our two gardens, the following directions are given. To see the "Home Planting," look for house, with signs, just off of 1st street, on D street, as you enter Davis from the East. It is the first house on the left side. The "Field Planting" is located on the Frank Towse ranch exactly one half mile east of the Yolo County Fair Grounds, on Road 24, near Woodland, California. Both of the gardens bloom almost simultaneously, so please write for the expected peak of bloom. We seem to be located in a warm belt, therefore bloom a little earlier than any other commercial garden in Central California. We will be looking for you.

1956 INTRODUCTIONS

HEATHER ANGEL (Linse '56) 37". Midseason to late. One of the handsome NSCAPS from the Linse gardens, and much darker and later than others being introduced by Linse this year. The fully rounded flowers, 8" across, of Onco form are absolute perfection! The color is a smoozn Heather Purple with blue tipped beard, and the big rounded flowers with broad fully domed standards have semi-flaring falls 3½ inches across. A sturdy plant making good growth and increase, and having strong stalks with two good branches and terminal. Substance is extra heavy. Few iris have the perfection of form and the long lasting qualities of this fine hybrid introduction. Seedling NSCAP—29. New Snow x Capitola. Each \$20

GLOBETROTTER (Linse 1956) 42". Midseason. This is a huge golden tan iris, known for several years in the Linse gardens as KING SIZE. Its size is immense, blooms having an eight inch spread with falls three inches across. It is a blended self of rose golden tan, with upper part of the standards and lower part of the falls deep rose. Buff at the sides of the haft and a margin of gold buff around the edges. Beard is yellow. Form and substance are both good, and the tall stalks have three to four branches with terminal. It has proven an excellent parent, being fertile both ways. (Tobacco Road x Casa Morena) x Bryce Canyon) x Orange Man. Each \$20

CELESTIAL VALLEY (Wedgwood 1956) 36". Midseason. A light blue self (Wilson Color Chart 640/3) with deeper blue Onco veining. Domed standards with broad flaring horizontal falls of exceptional substance. Very sturdy and a fast increaser. Blooms are of long lasting quality making this a very desirable hybrid. Tested in all climates and found to be very hardy. Seedling SC-1 (Snow Flurry x Capitola.) Each \$15.00
